

PENTACON

Civil Construction Services that pursue quality

Establishment

Pentacon Contracts CC was established in July 1998 with the sole purpose to enter into sub-contract agreements with Main Building Contractors focussing on earthworks and paving related projects, in Gauteng.

Evolution

In 2004 the Closed Corporation evolved to a Private Company whereby Pentacon Civils (Pty) Ltd was founded. In 2021, Pentacon Civils teamed up with Social Upliftment Solutions (SUS), as a partner, to establish our footprint and to add value to the direct community in the Tshwane area.

Widening our Scope of Work

In 2004 it was decided to widen our scope of work, and hence, we started tendering on all types of Civil Construction related projects, that eventually led to the establishment of Pentacon Plant and Pentacon Holdings, which formed part of the Pentacon Group of Companies. Since then, we have gone from strength to strength, and we are proud to have been registered in 2023, as a Level 1 BB-BEE contributor.

Civil Construction Services that pursue quality

Contract Specification:

1. Demolishing of buildings, hardstands and structures. Using our Mobile Crushing Plant, which crushes the clean rubble into usable road construction materials.
2. Bulk earthworks including retaining walls and concrete structures.
3. Bulk services: storm water, sewer works, domestic water and sleeves.
4. Layer works for warehouses and concrete hardstands.
5. Refurbishment of old concrete hardstands: breaking of hardstands, rehabilitation of layer works, re-installment of concrete as well as soft seal joints.
6. Road widenings on Town Council reserves, and new township development.
7. Final layer works for asphalt and/or paving of roads and parking areas.
8. Detailed paving and kerbing of shopping centres, landscaping and parks.

Our Methodology:

1. Pentacon Civils strive to provide the Best Quality workmanship, at the most affordable price, and in the shortest possible time. We take pride in adding valued engineering in each project, to the benefit of our partners and clients.
2. Through our 25 years of experience in the Civil Construction Industry, we have established what methodology will lead to the highest possible end result, to ultimately maintain the highest level of quality.
3. We believe in dedicated team work, to meet only the highest expectations of our clients, that ultimately leads to successful projects.
